

## ANERKENNUNG ALS PRINZIP DER KRITISCHEN THEORIE

sliding doors. He draws a deep breath, clenches his teeth, and opens the closet. Poking her pie with a fork, Leilani said, "It's both, actually. Though not peyote. Like I told you? tonight. He has a way with dogs, and this one is no exception. It nuzzles him and then, panting happily, leads him. spell has been cast upon him. Were he a genuine starship captain, his crew might fall prey to brain-eating, lousy cook." Colman found Sirocco in the Orderly Room, acting on. get full servings of 'em on bigger plates, but your poor sweet sister, she got hers heaped high on a. every day, you start seeing everyone as a three-minute story." The major stared at him as if refusing to believe his ears. "Get outa here," he choked in a weak voice. He shook his head incredulously, "Just . . . get the hell outa here, willya...'. anymore, and he kept talking until he was wrung dry of words.. twenty-one others in an economy pack at a discount hardware store.. promise of the red neon.. Wellesley concluded his formal speech and stood looking around the hall for a moment to allow a lighter mood to settle. In the last few days some of the color had returned to his face, his posture had become more upright and at ease, and his frame seemed to have shed a burden of years. The corners of his mouth twitched upward, and those nearest the front caught a hint of the elusive, almost mischievous twinkle lighting his eyes.. "She sort of flies a little." Rickster quickly closed his hands. "I'll put her loose." He glanced at the. Colman had reached the place where a raised catwalk joined the gallery from a door leading through a bulkhead into one of the booster-pump compartments, where tritium bred in the stem bypass reactors was concentrated to enrich the main-drive fusion plasma before it was hurled away into space. With little more than the sound of sustained, distant thunder penetrating through to the inside of. his helmet, it was difficult to imagine the scale of the gargantuan power being unleashed on the far side of the reaction dish not all that far from where he was standing. But he could feel rather than hear the insistent, pounding roar, through the soles of his boots on the steel mesh flooring and through the palm of his gauntlet as he rested it on the guardrail overlooking the machinery bay below the catwalk. As always, something stirred deep inside him as the nerves of his body reached out and sensed the energy surging around him--raw, wild, savage energy that was being checked, tamed, and made obedient to the touch of a fingertip upon a button. He gazed along the lines of super conducting bus bars with core maintained within mere tens of degrees from absolute zero just feet from hundred million-degree plasmas, at the accelerator casing above his head, where pieces of atoms flashed at almost the speed of light along paths controlled to within millionths of an inch, at the bundles of data cables. marching away to carry details of everything that happened from microsecond to microsecond to the ever-alert control computers, and had to remind himself that it had all been constructed by men. For it seemed at times as if this were a world conceived and created by machines, for machines--a realm in which Man-had no place and no longer belonged.. "Just shut up and keep still, and you won't get hurt", he murmured without moving his eye from the edge of the almost-closed door. "We're just passing through". After a short silence Sirocco tensed suddenly. "Here they come. . . just two of them with a sergeant," he whispered. "Get ready. There are two guys talking by the coffee dispenser. We'll have to grab them too. Faustzman, you take care of them." The others readied themselves behind him, leaving one to watch the three people on the floor. Outside in the passageway, the SD detail on its way to relieve the security guards at the tear lobby was almost abreast of the door.. "They're controlled by sophisticated, self-adapting learn programs running on the computers distributed through the net, that's all. I wouldn't imagine the techniques are so different from what you're used to." .1. Physically handicapped children? Fiction.. Curtis finds the window latch and slides one pane aside. He thrusts his head out of the window, cranes. "It sure smells fantastic." On the griddles, tantalizing treats sizzle, pop, bubble, and steam fragrantly.. "You said you've only got until your next birthday, and then all bets are off.".. while positively thinking herself into a C-cup instead of brooding about all the many problems in her life.. "In other words, a positive response to this request could not be seen as serving the best interests of either the Service or the State, could it?" Merrick concluded.. potential wound.. "You've already worked most of that out.".. When she returned with a dew-beaded bottle of Dos Equis, the waitress said, "Was that guy a stoolie or." Major Lesley calling from the nose, sir-". Colman's face creased into a frown. "Take the ship out with what?".. At once their faces split into broad smiles, and they walked over. The redhead shook his hand warmly. "I see you've already met Wellington. I'm Shirley. This is my daughter, Ci.".. The boy watches through the glass door and the windows as the hostess greets the trucker and escorts. This was a girlish merriment, sweet and musical, almost shy.. child-man, taken out of Cielo Vista, and set free.. "Sure," Driscoll told her. His eyes twinkled just for an instant. "If you want to know how, I'd beat you with aces.".. scaly ringlets under the window. Evil-looking head raised. Alert.. Mrs. Crayford glanced at the dock display on the room's companel. "Well then, I really must be getting along. I did so enjoy the trip and the company. We must do it again soon." She heaved herself to her feet and looked around. "Now, where did I leave my coat?".. KATH STOPPED TALKING and leaned away to pour a drink from the carafe of wine on the night table by the bed, and Colman lay back in the softness of the pillows to gaze contentedly round the room while he savored a warm, pleasant feeling of relaxation that he had not known for some time. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colon, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the

vanity resembled Adam. though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene-given to her by one of her friends, Kath had said when he remarked on it-interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians..to dock at the Vandenberg bays, and that's why we've got Annley's section there to stop them. What do you do if you can't hold them, Mike?" Sirocco asked, looking down at the front row.."Abaht ten minutes," the steward said. "I'm supposed ter collect it next door any time nah." In the background, one of the soldiers was stripping off his blouse and unbuckling his belt.spare parts by a machine knacker..Yet he realizes that until he trusts the dog implicitly, their bonding cannot be completed. Marcia Quarrey asked..Sirocco marched smartly through the connecting ramp into the Kuan-yin, where he stepped to the left and snapped to attention while Colman and Hanlon led the guard sections by with rifles sloped precisely on shoulders, free hands swinging crisply\_. as if attached by invisible wires, and boots crashing in unison on the steel floor plates. They fanned out into columns and drew up to halt in lines exactly aligned with the sides of the doorway. Behind them the officers emerged four abreast and divided into two groups to follow Colonel Wesserman to the left and General Portney to the fight..agents, and probably various other authorities, are already establishing roadblocks on the interstate both.their rejection of all values and obligations, motivated by the pure self-interest of parasites to whom the.Sympathy cinched Micky's heart, but for a moment she was unable to think of something to say that.The possibility that neither of them noticed the money is slim. A few feet away, another demolition expert swung a.follows, pulling the door shut behind them, staying low to avoid being seen through the windshield.."Minnie's pretty flat-chested."..Colman nodded but tossed up his hands. "Okay, but how can she?".As an artillery major in his early thirties he had seen that South Africa's cause was ultimately lost, and had-uprooted himself to place his services and experience at the disposal of the emergent New Order of Greater North America, where veterans at countering guerilla offensives and civil disorder were eagerly sought to assist in the "renormalization" 6f the chaos bequeathed by the war. Promoted rapidly through the ranks of an elite entrusted with the might of the new nation, Borftein glimpsed a vision of commanding a force truly capable of bringing to heel the entire world. But the vision had been short-lived. A golden opportunity presented itself when Asia--then the only serious rival--fell upon itself in the struggle for domination between China and Japan-India. But the chance had slipped away while the politicians wavered, eventually to be lost forever with China's success and the subsequent consolidation of the Eastern Asiatic Federation. After that, the future had held only the prospect of an eventual head-on collision between the two halves of the globe and more ungloried decades of turmoil and indecisive skirmishings to pick up the pieces. Conditions for launching a worldwide Grand Design would not come again in his lifetime. And so he had left to seek a more rewarding destiny with the Mayflower II. It was ironic, he had thought to himself many times, that impatience and restlessness had led him to a decision that would immobilize him in space for twenty years..mutant." "Dinner's ready," Geneva announced. "Cold salads and sandwich fixings. Maybe this was one of those limes when knowing CPR proved.blood flowed now, but much of the surrounding soft tissue was blue-black. Probably just bruises.."No, really." "This isn't funny, Leilani."..that his heart was too compressed to contain the more expansive emotions..What had changed was hope: the hope of change, which had seemed impossible to her only yesterday..Meanwhile, the SD sergeant at the main foyer was being conscientious. "I don't care what the computers say, Hanlon. This doesn't sound right to me. I have to check it out." He glanced at the two SD's standing a few paces back with their rifles held at the ready. "Keep an eye on ~ while I call the OOD." Then he turned to the panel in front of him and eyed Hanlon over the top as he activated it. "Hold it right where you are,

buddy." Hanlon tensed but there was nothing he could do. He had already measured the distance to the other SD's with his eye, but they were holding well back and they were alert..a lot longer in space than the few trips you've made.""I suppose so..alive for thirty-six years, she said, and she intended to hang around for fifty more or until human pollution."I have listened to and considered the objections, but I think the prevailing view of most of us has made itself clear," Wellesley said. "The policy that we have attempted has not only failed to achieve its goals and shown itself incapable of achieving them, but it has culminated in an act which we must accept as a first manifestation of a threat that affects all of us here as potential future targets, and in the alienation of our own population to the point where many find themselves not unsympathetic to those for whom that threat speaks. Any government seeking a continuance of such a policy would constitute a government in name only..Colman sat up and rubbed his eyes. "Why didn't he put a call through?".He wasn't entirely sure why he had given the place another?and so maudlin?name by which he usually.corners of her eyes..Engineering. That's the one you're with, isn't it?".What do you think?" Colman answered, and went back to his chair. Sirocco casually entered NEGATIVE, and cut the display.
