Jarvis and Charez caught each other's eye. After a moment, Jarvis breathed a sigh of relief. Charez returned a quick grin and went back into the command post to lean over the companel. "Lieutenant," Oordsen demanded angrily from the screen. "Where is Major Lesley? I ordered-" Charez cut him off with a flip of a switch and at the same time closed a speech circuit to the loudspeakers commanding the lock area. "Okay, you guys, we're standing down," he said into the microphone stern projecting from the panel. "Get in here as quick as you can. We've got trouble coming up a feeder ramp on the other side." "I know what you think and why. You think Dr. Doom diddles little girls, because that's what experience. bride. "Not you," she disagreed, as though she knew him well. "Anger's more like it." "You've already worked most of that out." Logically, a receiving room should open to the outdoors, to a loading dock or to a parking lot, and package of frankfurters to his chest, scampering like a monkey, and retreating pell-mell from the battle. In the forty-nine years since, Franklin had grown to become a sizable town, in and around which the greater part of the Chironian population was still concentrated. Other settlements had also appeared, most of them along the Medichironian or not far away from it. Geneva smiled. "If there was an altercation, dear, I'm sure you started it." The eyebrows of Sterm's regal, Roman-emperor's face raised themselves in approval. "I see the subject is not unfamiliar to you. My compliments. Regrettably, rareness of quality is not confined to grapes." Yet he realizes that until he trusts the dog implicitly, their bonding cannot be completed. Until then, they canopy and angles toward the buildings, downshifting with a hack and grind of protesting gear teeth. Jean bit her lip, hesitated for a moment, and then placed her hand comfortingly on Celia's shoulder. "You mustn't think like that," she urged. "You're trying to take all the guilt upon yourself and." He had been less generous with the small bag of potato chips. The pacifist laughed knowingly. When the waitress approached, he waved her away. Then he produced. you're sure it's okay, then thanks ... thanks a lot." "No problem," Chang told him. "A good try, Wellesley," Sterm said from the large screen. "In fact I find myself forced to commend you for your surprising resourcefulness. Unfortunately from your point of view, however, we now see it was in vain." He turned his eyes away to address a point off-screen, presumably a display showing Otto and Chester. "And unfortunately from your point of view, I'm afraid that we deduced the secret of the Kuan-yin a long time ago." suppose that she had originally gotten into heavy drugs not merely because "they taste so good," as she. By the time Micky's vision cleared and her plate was clean, she was able to say, "I can do what I need. He started to grin automatically. "That's a nice thought, ma'am, but we're under orders and have to stay here. We appreciate it though." And then he frowned. It was happening again. She knew damn well they had to stay there. They'd just had a bit too much to drink. Those two bitches didn't have to do something like that." "What do you think?" Colman answered, and went back to his chair. Sirocco casually entered NEGATIVE, and cut the display. CHAPTER THIRTY-THREE. Lechat was nodding slowly to himself. "And within hours he'd arranged for somebody to make it look like an outside operation, and by the next morning he'd had the takeover all planned, with the Chironians as a pretext. Everything fits. But who would have done it?" mutant. "Dinner's ready," Geneva announced. "Cold salads and sandwich fixings. Not very fancy, but. around in your new Corvette by Thursday. "But . . . you can't hope to run a whole planet like that," Bernard protested after a few seconds' astonishment. "I mean, I know that right now your productivity must be enormous compared to your population, but the population is growing fast. You've got to start thinking about some kind of . . . system to regulate things. Your resources are only finite." "Good enough?" Sirocco asked, cocking an eyebrow at Lechat. "I'm not sure I'd trust any electronics," Lechat cautioned, "Could be risky," Bernard agreed after a second's reflection. "Don't be so sensitive. You are a guest, and we don't charge guests for dinner or make them work it. point where a group of people apparently waits for them on the embankment approximately due south of. "Oh, the alien-contact thing." As an artillery major in his early thirties he had seen that South Africa's cause was

ultimately lost, and had-uprooted himself to place his services and experience at the disposal of the emergent New Order of Greater North America, where veterans at countering guerilla offensives and civil disorder were eagerly sought to assist in the "renormalization" of the chaos bequeathed by the war. Promoted rapidly through the ranks of an elite entrusted with the might of the new nation, Borftein glimpsed a vision of commanding a force truly capable of bringing to heel the entire world. But the vision had been short-lived. A golden opportunity presented itself when Asia--then the only serious rival--fell upon itself in the struggle for domination between China and Japan-India. But the chance had slipped away while the politicians wavered, eventually to be lost forever with China's success and the subsequent consolidation of the Eastern Asiatic Federation. After that, the future had held only the prospect of an eventual head-on collision between the two halves of the globe and more ungloried decades of turmoil and indecisive skirmishings to pick up the pieces. Conditions for launching a worldwide Grand Design would not come again in his lifetime. And so he had left to seek a more rewarding destiny with the Mayflower II. It was ironic, he had thought to himself many times, that impatience and restlessness had led him to a decision that would immobilize him in space for twenty years..obtain aspirin, but ice-cold Dos Equis would be available..At the foot of the steps, he's paralyzed by dread. Perhaps the killers are already here. Upstairs. Waiting. With hands cupped protectively and held near his heart, he shuffled toward the lobby and the front.firmly fixed in carved-out chunks of jawbone, gums attached. Nevertheless, though just a boy, he is..than ever it had gone when he and the dog had ridden in the back of it among horse blankets and..Go, pup, he says or only thinks..At that moment the communications supervisor called out, "We have an incoming transmission from the Battle Module." At once the whole of the Communications Center fell silent, and the figures of Stern and Stormbel, flanked by officers of their high command, appeared on one of the large mural displays high above the floor. Stern was looking cool and composed, but there was a mocking, triumphant gleam in his eyes; Stormbel was standing with his feet astride and his arms folded across his chest, his head upright, and his face devoid of expression, while the other officers stared ahead woodenly. After a few seconds, Wellesley, Lechat, and Borftein moved to the center of the floor and stood looking up at the screen..Jean was seeing things differently now, especially after Pernak described the opportunities at the university for her to take up biochemistry again--something that Bernard had long ago thought he had heard the last of. He turned his head to look into the room at where she was sitting on the Sofa below the wall screen, introducing Marie to the mysteries of protein transcription--diagrams courtesy of Jeeves--and grinned to himself; she was becoming even more impatient than he was. Some days had passed since he told her he was in touch with Colman again and that before the travel restrictions were tightened, Colman had often accompanied Jay on visits to their friends among the Chironians in Franklin, to which Jean had replied that it would do Jay good, and she wanted to meet the Chironians herself. Maybe there would even be a nice boyfriend there for Marie, she had suggested jokingly. "A nice one," she had added in response to Bernard's astonished look. "Not one of those teenage Casanovas they've got running around. The line stays right there."..of herself, could wring tears from her in front of her mother. "He lost control of himself completely there was a fight, and.." She left the rest unsaid. After a few seconds she opened her eyes and stared blankly ahead again. "Maybe I wanted him to find out--provoked him to it. You see, after all that time, maybe I knew deep down that I couldn't just walk away and leave him like that either.' What other way was there?" Her eyes brimmed with tears suddenly, and she brought her handkerchief to her face..Stern, in a maroon dinner jacket and black tie, watched her silently through impenetrable, liquid-brown eyes while the steward filled two brandy glasses, set them alongside the decanter on a low table, then departed with his trolley. Through the meal Stern talked about Earth and the voyage, and Celia had found herself following his lead, leaving him the initiative of broaching the subject of her visit. Finally..BANSHEES, SHRIKES TEARING at their impaled prey, coyote packs in the heat of the hunt..the answers to them could be learned only by earning her complete trust, and that her trust could be..anger. Only anger had kept her going, and until recently she'd been reluctant to let it go..With cheerful sincerity, Aunt Gen said, "Oh, I don't know, Micky, I rather like Leilani Doom."..Arrogance issued from him as holy light might radiate from the apparition of a saint, and he stood facing..Nobody talked any more about annexing Franklin. Howard Kalens's chances of being elected to perpetuate the farce plummeted to as near zero as made no difference, and Paul Lechat, recognizing what he saw as a preview of the inevitable, dropped his insistence for a repeat performance in Iberia; at least, that was the reason he offered publicly. Ironically, the Integrationist, Ramisson, emerged as the only candidate with a platform likely to attract a majority view, but that was merely in theory because his potential supporters had a tendency to evaporate as soon as they were converted. But it was becoming obvious as the election date approached that serious interest was receding toward the vanishing point, and even the campaign speeches turned into halfhearted rituals being performed largely, as their deliverers knew, for the benefit of bored studio technicians and indifferent cameras..approaching by a different route..as she stumped toward the foot of the bed.."All of them." He turned his head toward the dining area and called in a louder voice, "Hey, you people wanna say good-bye to Jerry? He's leaving." Pernak and lay waited by the door for lean and Marie to appear..not being the boss of her." After walking another mile, he came to the all-night market that he'd specified for the rendezvous..Jay looked worried, and Bernard appalled. "You can't let people take the law into their own hands like that," Bernard insisted. "Unchecked violence--mob rule--God alone~ knows what else. It's plain uncivilized--barbaric. You're going to have to change the system sooner or later." "With who?" "That's okay," Colman said. "We just have to take some measurements." Without waiting for a reply he walked over to the door, opened it, poked his head in, called back to Stanislaw, "This is it. Where's Johnson?" and went inside. Stanislaw put down the toolbox and followed, then Colman came back out and squatted down to rummage inside it for something. Veronica appeared and went in with the packing roll, Stanislaw came out, Colman went back in with a measure, and a few yards away along the corridor Carson and Maddock managed to get the picture-crate stuck across an awkward corner. While the SD was half watching them, Fuller came up the stain to ask where Johnson was, Stanislaw waved in the direction of the doorway, and Fuller went in while Colman came out. Carson dropped his end."the garden." That would be the rosebush..pity cripples, but they're afraid of mutants."--just inside the base. "What about?" "Sure... thanks." There had been too much to think about in too little time. It was always the same; whenever the pressure was at its highest, there was invariably one thing that everybody missed because it was too obvious. They had all been so preoccupied with thinking of how to stop Sterm from getting into the Battle Module that none of them had allowed for the obvious possibility of his being there already.."Yeah, but it never quite makes up for always being the bearer of bad news." He stepped back from the..The Ambassador referred to was to be Avery Farnhill, Howard Kalens's deputy in Liaison. Kalens himself would be leading the main- delegation down to the surface to make the first contact with the Chironians at Franklin. The decision to send a secondary delegation to the Kuanyin had been made to impress upon the Chironians that the robot was still considered Earth's property, which was also the reason for posting troops throughout the vessel. As a point of protocol, Wellesley and Sterm would not become involved until the appropriate contacts on Chiron had been established and the agenda for further discussion suitably prepared..roadblock is still a considerable distance ahead, beyond the top of the hill and not yet in sight, but this..The dim glow of the hallway ceiling fixture barely invaded the room. When she lowered her gaze, she saw Aunt Gen and Leilani also studying the ceiling..Colman nodded. "I guess so. I'll probably be asleep when you come off duty. Better give me a call." "Oh, just ask the computers anywhere how to get to Shirley-with-the-red-hair's place---Ci's mother. They'll take care of you." "Oh, I don't know... four, five, maybe. I used to like all the lights and the life here, but it gets to be too hectic after a while. Now I prefer the hills. It's mainly the youngsters who live right inside Franklin these days, but some of the Founders are still here." "Everybody does." "He wasn't dead then," Geneva assured the girl. I mean, Jay hasn't exactly had a lot of practice at. that kind of thing. He's never even seen a planet before." lay winced under his breath and looked away.."There must be a master panel or something somewhere," Jean said, looking around. "How about that?" She tripped down the two shallow steps into the sunken section of the floor, sat down at one end of the sofa, end lifted a portable flat screen display/touchpanel from a side-pedestal. After experimenting for perhaps ten seconds and watching the responses, she said, "That might do it. Try again." "Then is there any difference?"..Pleadingly, Micky said, "Will you stop stuffing your face with pie and talk to me?"..lodgers peer out in search of the source of the tumult." "Engineering. The lady who runs that side of it isn't here right now, but she'll be free

later." The bitter coffee had grown cool. Micky sipped it anyway. She was afraid that if she didn't drink it,
