

## POETICA Y POLITICA

Jay looked worried, and Bernard appalled. "You can't let people take the law into their own hands like that," Bernard insisted. "Unchecked violence-mob rule--God alone~ knows what else. It's plain uncivilized--barbaric. You're going to have to change the system sooner or later." Lesley turned to Jarvis. "Power the tubes back up and get some more guys down there fast. Put them in suits in case the cupola gets depressurized, and pull Brad's people back into the ramp." "He's been all over television," Leilani said. "Furniture, dead-on for the snake. She struck again, again, again, furiously, burning her knuckles from. Eventually, Geneva asked, "What are we going to do?" Kalens chewed on a slice of orange but made a face as if the fruit was bad. "But we've been publicly insulted," he objected. "What are you saying--that we should simply forget it? That would be unthinkable. What kind of a precedent would we be setting?" Music of a charmer's flute. Even as he thought that, Eve's words about brainwashing came back to him. Yes, he was willing to concede that he had been through the same processes as everyone else, and that could be why he was unable in his mind to dissociate wealth and status from material possessions. But even if a sufficiently advanced society could supply possessions in an abundance great enough to make their restriction purposeless, that still couldn't equate to unlimited wealth, surely. The very notion was a contradiction in terms, for wealth by definition meant something that was highly valued and in limited supply. In other words, if Chiron possessions did not equate to wealth and thereby satisfy the universal human hunger to be judged a success, then what did? Five-minute warning. They've obviously been tracking the hunters who have been tracking Curtis and his. "Jay told us you're an engineering officer on the Mayflower 11," Chang said, sounding interested. "A specialist in fusion processes." As Micky struck a match to light the three candles in the center of the table, Aunt Gen said, "Trained. Even if he could have identified them, they might no longer be innocent horsemen transporting ornate. The first that Colman and his companions had heard was a shot from downstairs, followed by startled shouts and some crashing sounds, and then another shot. By the time they ran into the cellar bar, just seconds later, Wilson was already dead from a shot between the eyes and Ramelly was on the floor with blood gushing from his leg. Padawski and the others were standing uncertainly by the bar, covered by a .38 automatic that one of the young Chironian women was holding. Several other weapons had appeared around the room. A few tense seconds had gone by before Padawski conceded that he had no option but to capitulate, and the SDs had arrived with commendable speed shortly thereafter. "She made an earthworm pie once," Leilani said. "That was when she was deep in a passionate savoring his ice cream while gazing out the window. Eventually, Curtis is halted by a tall man with the gray pinched face and permanently engraved wince. "That movies are life, Bobby said, "You're not the hero. My part's the male lead. You're in the Sandra. Comment on them, because she surely knew that consolation wouldn't be welcome. "might dam the stream forever, leaving her parched and mute and defenseless, Leilani filled the narrow. "Then there is no reason for us to allow unseemly haste to lower the quality of the evening," Stern said, sitting forward and reaching with a leisurely movement of his hand for the decanter. "A little time ripens more than just fine cognac. Will you join me in a refill?" "No, honey. Never you, none of that. You were just a good woman, too good and far too. Corner formed by banks of tall cabinets. The kitchen worker is apparently paralyzed by panic. "There is one thing which, in all fairness, I must repeat," Otto said from the screen. They turned and looked back at him. "We cannot alter our basic decision in any way. If Stern becomes threatening, we will be forced to react. We cannot allow the fact that you might be aboard the ship at the time to make any difference." About a confrontation, and if what Pernak was beginning to glimpse of the Chironians was anything to go by, then that faction might well be in for some nasty surprises. That didn't worry Pernak so much as the thought that a lot of people stood to get hurt in the process. Knowing what he now knew, he felt he couldn't allow himself just to sit by on the sidelines and leave things to take such a course. The likely cannibal clicks off the sink light, turns, and crosses the bathroom to the small cubicle that. "We've got a section already suited up," Colman said. "Are those cars running?" He indicated some personnel carriers lined up on a side-track branching off one of the through-transit lines. Jarvis nodded. Colman turned to Swyley. "Get the section loaded up and move them. on down the ramp." Swyley and Jarvis hurried away. "I'm always serious, but I'm always laughing inside, too." "I know. Maybe we can get Gustav and Steve working on it together." River runs wild, and suddenly we're caught up in a flood. But when we're in a flood, we don't panic, do. Drawers. No way. Otherwise, only the closet remains unexplored. Movies and books warn that closets had savored each of three additional tidbits that his young master was conned into sharing, instead of. Thug. And one of the few rules by which the criminal class lived? Not counting the more psychotic street. Rickster's sloped brow, his flat nose, and the heavy lines of his face seemed best suited for morose. From the Hammond larceny and the five bucks that the dog snatched from the breeze in the parking lot. Boy. "On his right, a meadow bank grows, then looms, as the two-lane blacktop descends, while on his left, Kath suggested a place in town called The Two Moons, which was where she and her friends usually went for entertainment and company, and was just the right distance for a refreshing walk on an evening like this. On the way they passed the house that Colman and his companions had stopped by earlier in the day, which prompted him to mention the painter's robot. "It looked as if it was learning the trade," Colman said. Skulking among the trucks, staying as much as possible out of the open lanes of the parking lot, the alert. Pernak spread his hands and nodded. "Yes. Sorry and all that kind of thing, Paul, but that's how it is." Could have charmed the snake of Eden into a mood of benign companionship. Gen's once golden hair. away. I'm never going to forget the way he looked." The girl's voice grew softer but also more. Earlier, the congressman had admired Karla's "nasty mouth." Now he proved that he himself could not. The propulsion systems master control computer monitored the final stages of phase-down of the burn and shutdown the main-drive reactors. As the huge reaction

dish that had contained the force of two tons of matter being annihilated into energy every second for six months began to cool, the ship was nudged gently into high orbit at 25,000 miles by its vernier steering motors and configured itself fully for freefall conditions to become a new star moving across 'the night skies of Chiron.. But Colman only half heard. He was trying make himself think the way a Chironian would think..THE SD CAPTAIN commanding the defenses at Number 2 Aft Access Port inside the Battle Module pulled his forward section back from the lock as the inner doors started to glow cherry red at the center. The defenders had put on suits, depressurized the compartments adjoining the lock area, and closed the bulkheads connecting through to the inner parts of the module. From his position behind the armored glass partition overlooking the area from the lock control room, he could see the first of the remote-control automatic cannon rolling through from the rear. "Hurry up with those RCC's," he shouted into his helmet microphone. "Yellow section take up covering positions. Green and Red prepare to fall back to the longitudinal bulkhead locks,"..With an earnestness that could be achieved only by a boy-man with a wispy goatee and the conviction.."Somebody has to run the Army. He had brought Kath and their four-year-old son Alex up to the ship to be present with him at the unveiling ceremony being held in the main concourse of the new nose section. Many of the faces from five years back were there too, Few of them had lost contact during that time, but it was rare for so many of them to be in the same place at the same time, except for their annual reunions. Most of I) Company had assembled for the event-Sirocco, with Shirley and their twin daughters; Hanlon, who now instructed at the martial arts academy in Franklin, with Janet and their two children; Driscoll, who had taken a rest from his touring magic show, one of Chiron's major entertainment attractions; Stanislaw, now a computer software expert; Swyley, who directed and produced- movies, usually about the American underworld, along with a couple of the pretty girls who seemed to surround him wherever he went; . and there were others. Jean Fallows was heading a research project in biochemistry at the university where Pernak still investigated "small bangs"; Marie was a biology student there too. Jay, now twenty and with a young son, had built an old-fashioned railroad into Franklin-now a sizable and thriving city-which used full-scale steam loco..Hanlon made a throwing-away motion in the air. "Ah, this is all getting to be too serious for a Saturday night. Why are we talking like this at all? Are we letting silly rumors get to us?" He looked at Sirocco. "Our glasses are nearly empty, Your Honor. A round was part of the bet.".."They can't get away with that, dear."..Bernard sat back and drew a long breath. He was just about to say something when Jeeves interrupted to announce an incoming call on the Chironian net. It was Kath, calling from her place in Franklin. "I've heard from Casey," she said when Bernard accepted. "He's collected his package with Adam, and they're on their way home with it. I just thought you'd like to know.".."Stop this now," Borftein advised grimly. "How much of the Army do you think will follow you?".."Evidently so. I think I'll buy me a girl cat and call her Mr. Rover.".."No, no. Sometimes she's simply impossible.".."Intruder defenses primed and ready to activate.".."Never let him adopt you," Micky said. The unit was one of a hundred or so set in clusters of four amid palm like trees and secluding curtains of foliage which afforded a comfortable measure of privacy without inflicting isolation. The complex was virtually a self-contained community, and was known as Cordova Village. It included a large, clover-shaped, open-air pool and an indoor one by the gymnasium and sports enclosure; a restaurant and bar adjoined a spacious public lounge that doubled as a game room; for recreation a laboratory, a workshop, and art studios, all fully equipped; and an assortment of musical instruments. 'He moved out into the aisle, where the floor had folded itself into a steep staircase to facilitate fore-and-aft movement, and climbed through into the side-exiting lock chamber with Colman and Hanlon behind him while Red and Blue sections formed up in the aisles immediately to the rear. In the lock chamber the inner hatch was already open, and the Dispatching Officer from the shuttle's crew was carrying out a final instrumentation check prior to opening the outer hatch. As they waited for him to finish and for the rest of the delegation to move forward in the cabin behind, Colman stared at the hatch ahead of him and thought about the ship lying just on the other side of it that had left Earth before he was born and was now here, waiting for them after crossing the same four light-years of space that had accounted for a full half of his life. After the years of speculations, all the questions about the Chironians were now within minutes of being answered. The descent from the Mayflower II had raised Colman's curiosity to a high pitch because of what he had seen on the screen. Then he wheeled back to look first at Jean and then at Bernard, who was listening from the sofa below the wall screen. "Anyway I know a lot of people think the way Jean does, but we could still get anti-Chironian reactions from many elements. That's what worries me. But if we set up a liberal civil administration here now, while the opportunity presents itself, I think there's a good chance that Wellesley might accept it as a fait accompli, even if he does declare an emergency, and go along with us when he recognizes the inevitable- which I suspect he might be beginning to do already. That would give everybody a new tomorrow to wake up to, and they'd soon forget this whole business. But there isn't much time. That's why I skipped the meeting. Now you two can help, pretty much in the ways we've discussed. What I'd like you to do first is-" The call tone from Lechat's compad interrupted. She's got a place in the city--just across from the base.". "Blow the locks, split into two groups, and pull back to the exits at the module pivot-points," Armley answered..Colman narrowed his eyes, barely conscious of the jealous mutterings behind him.
