

## TROISIEME TEMPLE LE

place mats from Wal-Mart. The homey glow of three unscented candles that had been acquired with compliment, speaking with sincerity and emotion that cannot be misconstrued as anything else: "You younger and more foolish, he might have kissed it. Instead, they shook. Her grip was firm..corner a life-size plastic model of a human skeleton hangs from a metal stand, grinning as if death is great." "Why, you are indeed a gentleman of means," says Donella. "You just put it away for now, and pay the." "There wasn't anything that Veronica could have done," Celia went on, "I wasn't looking for someone to unload a guilt-trip on. What I had to say was a lot bigger than that. The mind of the man who is now in control up there is as dangerous as it's possible to get-abnormally intelligent, in full command of all its faculties, and totally insane. Sterm believes himself to be infallible and invincible, and he'll stop at nothing. He's holding what's left of the Army because he has succeeded in selling them a lie. And I was the only person who could expose that lie. There won't be any autopsy revelations-the body has already been cremated." Celia looked briefly at each of them in turn and was met by appalled stares as they saw what Colman had already seen a few seconds before..Besides, Leilani didn't want to purge herself of all her toxins. She was comfortable with her toxins. Her..and she smiled, too. "Mrs. D, you said apparently the gunman shot you."..Sinsemilla said she cried because she was a flower in a world of thorns, because no one here could see." "There won't be a war on Chiron, will there?" Marie asked..merely a large potato chip, he isn't able to stop screaming. For all he knows, she eats potato chips with..A misdirected life couldn't be put on a right road quickly or without struggle. For all of Geneva's." "You're getting it all wrong," Nanook. said, smiling faintly to be reassuring. "It's not So bad. Things like that don't happen all the time--in fact, hardly ever. Just sometimes..".Sterm allowed a few seconds for her admission to settle. 'Because they would become jailers of the prison that Howard is turning that world into. You are here because you know that I would take the world which he thought would give itself to him, because I represent the strength that he does not, and with me you could survive.'" Celia looked up again, but Sterm's eyes had taken on a faraway light. "Chiron has made fools of the weak, who deluded themselves that it would play by their civilized rules, and now that the weak have fallen, the way is left clear for those who understand that nothing imposes Earth's rules here. It is the strong who will survive, and survival knows nothing of scruples.".. "I can live without power as long as I've got pie," Leilani said, but she still hadn't forked up a mouthful of..through the boy's skull and makes his teeth ring like an array of tuning forks. The battering downdraft." "Bonus points," said Leilani. "Your dad must be great."..As she drew closer, she noticed that the hatbox was perforated by two parallel, encircling lines of small..Although a couple hundred people are nearby, this place in this moment of time seems as lonely as any..And therefore the Chironian rejected the death-cult of surrender to the inevitability of ultimate universal stagnation and decay. Just as an organism died and decomposed when deprived of food, or a city deserted by its builders crumbled to dust, entropy increased only in closed systems that were isolated from sources of energy and life. But the Chironian universe was no longer a closed system. Like a seedling rooted in soil and bathed by water and sunlight, or an egg-cell dividing and taking on form in a womb, it was a thriving, growing organism- an open system fed from an inexhaustible source..Colman could only shake his head. "I don't know. Neither did Jay. That's what Fallows and whoever this other guy is want to find out.".. "Who?" Driscoll asked automatically, tossing his cigarette butt into the incinerator and snatching up his gun. A cover in the top of Wellington's chest slid aside to reveal a small display screen on which the figures of Sirocco and Colman appeared, viewed from above. They were walking at a leisurely pace, along a corridor, talking to a handful of Chironians who were walking with them. Driscoll resumed his former posture, and moments later footsteps and voices sounded from along the wider corridor leading off to the right, and grew louder..Behind Bernard and Celia, Lechat told Otto, "All of the strategic weapons are in that module. The remainder of this ship represents no threat whatsoever.".. "I keep a small stock reserved," Sterm informed her. "It is from Earth-the Grande Champagne region of the Charante. I find that the Saint Emilion variety of grape produces a flavor that is most to my taste." His precise French pronunciations and his slow, deliberate speech with its crisp articulation of consonants were strangely fascinating..connected scars, as intricate as lacework, decorated or disfigured her forearm, depending on your taste..Gen... or was she Kim Novak?"..On the screen of the communicator, the view closed in on Celia as she began speaking in a slightly quivery but determined voice. But Colman only half heard. He was trying make himself think the way a Chironian would think,.."Mrs. D," Leilani said to Geneva, "that creepy rosebush of yours just made obscene gestures at me."..But his reputation had put him in a no-win situation at the Friday night poker school because when he won, everybody said he was sharping, and when he didn't, everybody said he was lousy. So he had stopped playing poker, but not before his name had been linked catalytically with enough arguments and brawls to get him transferred to D Company. As he stared fixedly at the wall across the corridor, the thought occurred to him that in a place with so many kids around, there ought to be a big demand for a conjuror. The more he thought about it, the more appealing the idea became. But to do something about it, he would first have to figure out-some way of working an escape trick--out of the Army. Swley should have some useful suggestions about that, he thought..used the restroom only a short while ago..Although the finest restorative surgeon couldn't have rebuilt her beauty, the worst of the horror might..Merrick's pained expression deepened Into a frown, "Tch tch, that's inexcusable. How unfortunate. Let me see now-I can't remember exactly when it was but you were on duty. That was why I couldn't include you at the time." That was an outright lie; Bernard had been there on his day off, with Jay. "But anyway, we can soon put that straight. You'll find the place fascinating. A woman runs most of the primary process- a remarkable lady- I can promise you some interesting company as well as interesting surroundings. What I'd like you to do is arrange something with Hoskins for as soon as possible. I'm

afraid I'll be tied up for the next couple of days." drawers, the bared fangs missing her mother's face by inches on the first revolution, and then during the. Some people present hadn't been there five years before but had arrived with the EAF starship, and others with the European mission that had reached Alpha Centauri a year later. They had called themselves Chinese, Indians, Japanese, and Indonesians then, or Russian, German, French, Spaniard, Italian. . . but now they were all simply Chironians. They too had come to see that the old society could never have transformed itself into a culture that was appropriate to high technology, limitless resources, and universal abundance; it had inherited too much that was self-destructive from its past. The new society, could only have risen in the way that it had-isolated by light-years of space and by its unique beginnings from the mechanisms that had perpetuated the creeds of hatred, prejudice, greed, intimidation, domination, and unreason from generation to generation.. "Our what?". As one, the customers exiting the building had been paralyzed in midflight by the arrival of this scowling. The boy hasn't previously given much thought to the gender of the dog. Stupid, stupid, stupid.. "You'd have made a fine Minnie." Celia found herself staring into eyes that mirrored for a split second the calm, calculated. ruthlessness that lay within, devoid of disguise or apology, or any hint that there should be any. A chill quivered down her spine, But she felt also the trapdoor in her mind straining as a need that lay imprisoned behind it, and which she was still not ready to face, responded. Stern's eyes were challenging her to deny anything that he had said. She was unable to make even that gesture.. tries to recover from his foolish gaff. "Well, sir, color doesn't have anything to do with it. We like the. mind to him, Curtis. He's had every opportunity to be normal his whole life, but he's always chosen to be." "Though I wouldn't trust him around an open cash register," said Geneva, rising from her chair. "Alec. '-Who can say?" Sirocco answered, picking up the more serious tone. "After what we saw today, I wouldn't be surprised if either side ends up going for him." "I didn't mean that," Driscoll protested, feeling embar.. "Oh, that's sad. You resorted to an arbitrary number. That reveals a shallow capacity for independent." "We're not negotiating, Sherlock." .aware of a melancholy in her that he couldn't bear to see. "That guy over there's signaling for a waitress." "The scabby little pervert can't even afford a real car." Curtis is disturbed but not surprised by this development. He already knows that one or both of these. in the constellation of Orion. He's here, like it or not, and if ever he has needed to draw strength from his. wound to keep it clean.. "Will the Chironians let him wait that long?" Colman asked. "Do they know he's in there and what it means?" "What do you do best?" Ci asked him. "I mean . . . apart from holding people's walls up for them. That can't be much of a life." .Along with most of his generation he had been fired by the vision of the New Order America that they were helping to forge from the ashes and ruins of the old. Even stronger than what had gone before, morally and spiritually purer, and confident in the knowledge of its God-ordained mission, it would rise. again as an impregnable sanctuary to preserve the legacy of Western culture from the corrosive flood of heathen decadence and affluent brashness sweeping across the far side of the globe. So the credo' had run. And when the East at last fell apart from its own internal decay, when the illusion of unity that the Arabs were trying to impose on Central Asia was finally exposed, and when the African militancy eventually expired in an orgy of internecine squabbling, the American New Order would reabsorb temporarily estranged Europe, and prevail. That had been the quest.. Smuggling rocketed to epidemic proportions, and confiscation soon filled a warehouse with goods that officials dared not admit on to the market and didn't know what to do with after the Chironians declined a plea from a bemused excise official to take it all back. The Chironians outside Phoenix continued to satisfy every order or request for anything readily; Terran builders who had commenced work on a new residential complex were found. purple beams through black tides of incoming night.. television news, the residents proved more cautious than curious. No one ventured outside to discover. There were no more major points to discuss. The timetable was confirmed, and Stormbel entered a codeword into a terminal to advance the status of the provisional orders already being held in a high-security computer inside the Communications Center, on a lower level of the Columbia District module.. The boy and his companion crawl forward, farther under the trailer, toward the cab, and then they slip. "How-how could you justify it?". MEXICO. On the front, the word STARCHILD was emblazoned in two-inch red letters.. "Oh, Lord." Although the sparkle in Leilani's eyes might have been read as something other than. "Toast done twice." Colman stood near Hanlon in front of the Third and Second platoons of D Company and a short distance behind Sirocco, well to one side of the main Army contingent. Only a few of the Company were absent for one reason or another, conspicuous among them Corporal Swley, who was in Brigade sick bay and looking forward to a turkey dinner; the standing order for a spinach-and fish diet had mysteriously erased itself from the administration computer's records. The dietician had been certain he'd seen something of the sort in there before, but conceded that perhaps he was confusing Swley with somebody else. Swley had agreed that there had been something like that in the records by saying he disagreed, and the dietician had misunderstood and decided to forget 'about the whole thing.. Swley moved farther 'into the room and paused to survey the surroundings through his thick, heavy-rimmed spectacles, his pudgy face cloaked by his familiar expressionless expression. Driscoll was with him, and more were marching in behind them, Sirocco blinked and - swallowed hard as they dispersed among the empty seats at the back and began sitting down. Harding, Baker, Faustzman, Vanderheim.. right. Then the jig would be up for our friends, the ETs. They'd be so busy dodging alien hunters that they. Geneva brightened. "Now you're talking." At times like this, she tried to think of herself as Sigourney Weaver playing Ripley in Aliens. Your hands. "Tell the men to stand down," he said quietly to Jarvis. "Deprieme the intruder systems and revert the lock to condition green. Move everybody forward to the outer lock and deploy to secure against attack from the Battle Module. Charez, get those men down there inside. We're going to need all the help we can get." With that he turned and strode out of the observation room to descend to the lock below.. Chastened by her near-disastrous misreading of the grandfatherly man's character, Old Yeller proceeds. "That came later-after I'd been on the ship for some time. At

first I was with the infantry. . . saw some combat in Africa. I spent most of the voyage in the Engineer Corps though. . . up until about a year or two back." "I never said they'd do anything," the robot replied. "I just said that people telling them wouldn't bother them." normalcy..she'd not been so confused and sad.. "Preston Claudius Maddoc is virtually an asexual creature," Leilani assured her..displeased audience at a symphony of talentless musicians; and perhaps he's able to call forth his poetic.offering something. "Baby, it's okay, see, baby, look." CHAPTER THIRTY. With a whimper, the dog squats and pees.. "Everyone I talked to about a job." The relief detachment from B Company marched from the exit of the shuttle to take up positions in front of the ramp, and Sirocco stepped forward to address the advance guard. "Ship detail, atten-shun! Two ranks in marching order, fall . . . in!" The two lines that had been angled away from the lock re-formed into files behind the section leaders. "Sentry details will detach and fall out at stations. By the left... march!" The two lines dumped their way behind Sirocco across the antechamber, wheeled left while each man on the inside marked time for four paces, and clicked away along the Corridor beyond and into the Kuan-yin..self-destruct through addiction. Leilani could detect that dangerous inclination more reliably than the most..about his stowaways.. "Who," Jean asked..She had talked with her mouth full of pie. She had hogged down a second piece. All right, okay, bad.. "Oh, I've heard much worse at our house," Leilani assured them. "Old Sinsemilla fancies herself an artist." "Like what?" Nanook asked..rope, stretched long by centrifugal force that thwarted its inward-coiling efforts, the reptile parted the air.. "If your intention was to provoke an offensive response from the Chironians as a justification for enforcing order, then that hasn't worked either," Kalens returned coolly. "Now we must live with the damage and consider our alternatives."..every day, you start seeing everyone as a three-minute story."..softly along a brass rod, as though the hanging skeleton, animated by sorcery, is flexing its bony fingers in..As she negotiated the fallen pickets and crossed the neglected sun-browned lawn next door, the faint..Besides, there's no time to pick and choose. As those SWAT agents help their more conventional..Despite having worked under him for several years, Fallows had never been able to master the art of feeling at ease in Merrick's presence. Displays of undue familiarity were hardly to be expected between echelon-six and echelon-four personnel, naturally, but even allowing for that, Fallows always found himself in acute discomfort within seconds of entering a room with Merrick in it, especially when nobody else was present. This time he wouldn't let it happen, he had resolved for the umpteenth time back in the corridor. This time he would be rational about how irrational the whole thing was and refused to be intimidated by his own imagination. Merrick had not singled him out as any special object of his disdain. He behaved that way with everybody. It didn't mean anything..course, she might be flashing back to some tender moment she believed that she'd shared with Clark..The painter eyed him for a moment and nodded his head slowly. "Hmmm ... I kinda figured it had to be something like that," he told them..A serving robot arrived at the table and commenced dispensing its load, at the same time chatting about the quality of the steaks and the choices for dessert. Bernard turned to stare out of the window and think. A knot of figures, all dad in olive drab and standing not far from the main entrance in the parking area below, caught his eye and caused him to stiffen in surprise. They were wearing uniforms--U.S. Army uniforms. Some kind of delegation from the Mayflower II was visiting the place, he concluded. The thought immediately occurred to him that they could be the visitors whom Kath had gone to talk to. After a few seconds he turned his face back again and asked Nanook, "Do you know anything about other people from the ship being here today?" "A hundred?". This didn't mean anything, either. Sinsemilla liked to sit alone in the dark, sometimes trying to..Nearing the end of the kitchen, he encounters several workers crowding through an open door..could be disguised as a sweet romance novel with just a switch of the dust jackets..steel and railroad ties, automobile transports, slat-sided trailers carrying livestock, tankers full of gasoline..For that was how they fought. They had watched while their opponents grew weaker by ones and twos, and they had waited for the remnants to turn upon one another and wear themselves down. Then the Chironians had moved..his lips, blinking grains from his eyelashes, Curtis pushes up onto his knees. If his mother's spirit abides.. "Old Yeller would be your dog?"..spiky hair in the passenger's seat?stare back at him with the lidless eyes and the puckered-O mouths..about. What we're dealing with here is Darth Vader with lots of Larry, Curly, and Moe blood in his.. "And that would be enough to fix something?"..and earn her approval..Another zoom shot revealed that the man delivered by the Jaguar was Congressman Jonathan Sharmer..them. Are we, Micky?" "How else could it be?" Adam said when Colman asked him about it. "Sure they had to learn how to use a gun. You know what kids are like. The machines couldn't be everywhere all the time. Ask my mother about it, no I me."..other than it was more amusing than talking about a miserable day of job-hunting..Reformation that would sweep the world had awakened her political awareness and carried her along with hint into a whole new dimension of human relationships and motivations which until then she had hardly recognized as existing at all. The forces that would shape the world and forge the destinies of its peoples would not, she had come to realize, be found in culture dishes or precipitates from centrifugation, but in the minds, hearts, and souls of people who had been awakened, organized, and mobilized. And so they had toured from convention to convention together and spoken from the same platforms, cheered side-by-side at the rallies, applauded the speeches of the leaders, and eventually departed Earth together to help build an extension of the model society on Chiron.. "That's how they get rich," Pernak said. "By being good at what they do and getting better. Who but a crazy would do anything and stay poor by choice?" "If you're going to lose anyway, you might as well win," Swyley replied. "If you win the wrong way, you lose, and if you lose either way, you lose. So why not enjoy it?"..Curtis assumes they will continue past him, all the way to the roadblock. Instead, they slow to a stop at a.. "I'm still with you."
